

Hello Sean

I'm sending you this letter in hopes you will share it with other perspective parents and students

My son joined your school for his grade 11 year in 2006.

He had been in the public school system and had been a challenging student from grade one on.

Grade 10 brought other challenges that we could not over come on our own.....

Social issues, drugs, self esteem issues. Drinking. If there was trouble, my son found it..... We were a driven upper middle class family and always worked hard. As “normal” as life gets....yet my son was on course to fail and drop out.

Your school, your effort, and your passion were our son's last chance to see a grade 12 diploma, never mind collage or university.....

Congratulations, Sean, our son got his. He did grade 12 at your school and applied to 4 universities and got accepted to all 4 universities,,,,,,

Our son loved the teachers, the mutual respect, the adult learning style...

Was it tough, damn right...and it did cost money...was it worth it as a parent?

YES.....

If you're reading this its because you're a student or a parent looking for the right thing..... Competence, passion, care, interaction—an intimate, trusting school.

Freemont IS all these things. The school was wonderful for my son.

My son will remember his experience at Freemont for the rest of his life....

This letter is 100% unsolicited..... Sean didn't even know it was coming....

I hope this helps Sean grow his business and allows a few more kids to live there dreams.....

Thanks
